oable

Oable is an Open Access (OA) management solution that empowers institutions with the tools to unify multiple publisher workflows and streamline management operations. Oable is designed to manage all OA articles (Gold and Hybrid) across 2,000+ OA publishers. Publisher integration is a vital part of Transformational Agreements.

* Requires OAS paid-license for customer and Oable sign a subprocessor annex with OAS to process the data.

† Historic data can be manually uploaded if the customer provides data report.

‡ On approval from Elsevier.

§ Selected data/journals supplied to Oable via the Wiley integration. Data determined by Wiley.

‖ Historic data - customer will need to define start date for the data prior to onboarding.

1 Historic data: Data pertaining to institutional research output and publication.
